Main idea of the Project

- The main idea of this project is to provide a platform for donors to donate funds for needy poor from anywhere easily.
- This is a website based project named “FundRaiser” which is integrated with payment interface called “Razorpay”.
- The website contains Gallery section where all the pictures of the work done by volunteers.
- Using Contact page anyone can contact us and become volunteers and can help in person.

Existing System

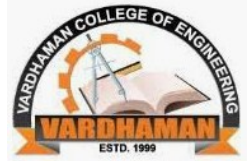

The existing system is mostly based on collecting funds via calls, door-to-door in person. It's difficult to collect funds in person and takes time.

The drawbacks of existing system are:

- Collecting funds in person is difficult.
- Waste of time.
- Limited collection.

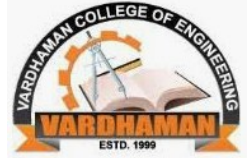

Proposed System

The proposed system is built as a website with a payment platform where anyone can donate money and help poor within minutes without any effort and the reach is higher than existing system:

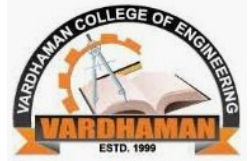

- Reduces time.
- Simple user-interface.
- Better user-experience.
- Online payment proofs can be maintained without any loss.
- Donors reach is very high.

Proposed Project Objectives

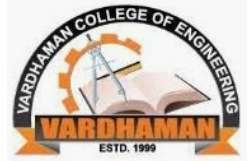

- The main objective of this project is to provide a platform for people to donate funds for the poor, homeless people & animals in India from all over the world.
- This platform also allows the interested people to volunteer in helping the needy.

Proposed Project Outcomes

- The outcome of the proposed project has full functionality of donating funds.
- The website is responsive so that user can use it on any device.
- Anyone can use the website with the help of simple user interface and better user experience.

Software and Hardware Requirement

Hardware requirements:

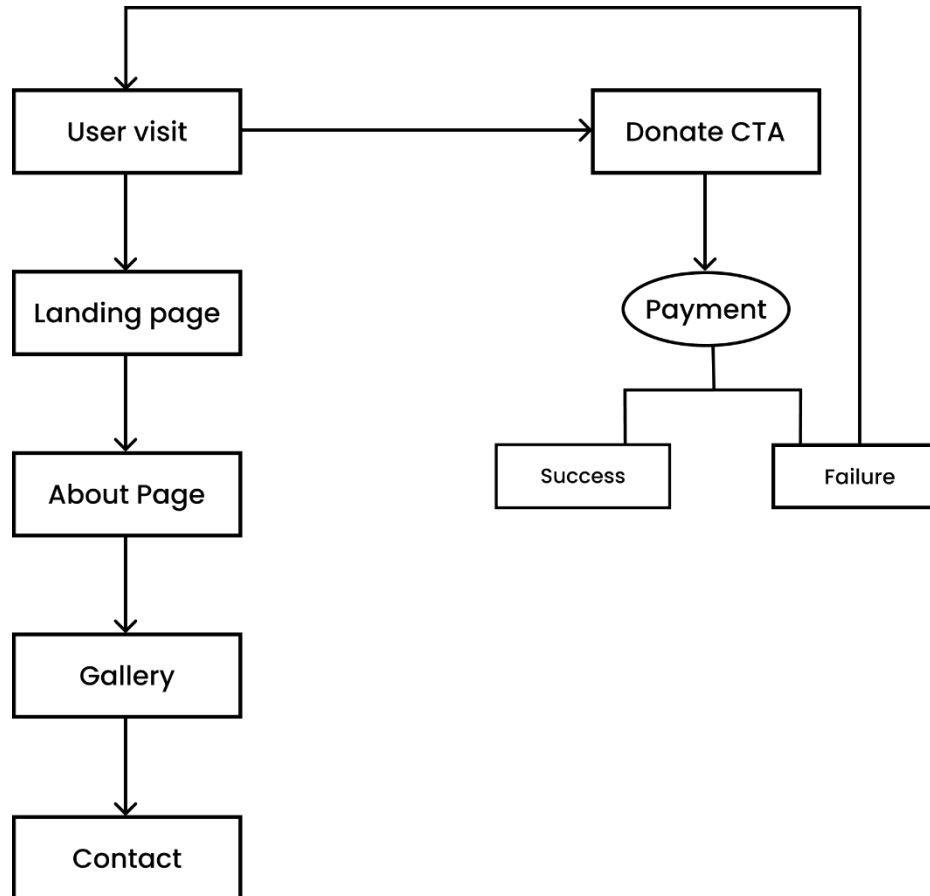

RAM	: 512MB or more
VGA(Desktop)	: 1024x768

Software requirements:

Operating System	: Platform Independent
User Interface	: HTML, CSS
Libraries	: Bootstrap, Bulma
Client-side Scripting	: JavaScript
Payment Gateway	: Razorpay Pages

Advantages

- Easy to donate from anywhere anytime.
- It provides simple user interface.
- As it's responsive we can use this website on any device.

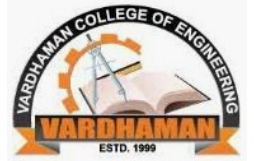

Conclusion

This website provides a computerized version of donating funds instead of funding in person which is difficult. Therefore, we developed a website as a platform between the organization and donors where the users can donate funds for the needy with the help of integrated payment mode called Razorpay. The site is responsive so that the users can use on any device without any breakdowns in the user experience. We conclude that the website is fully functional and easy to use with the help of simple user interface.

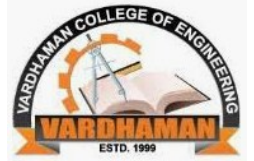

The user can view all the works done by the volunteers in a form a Gallery. The one who donates and the organization both will have a payment receipt in case of any payment issues.

Future Scope

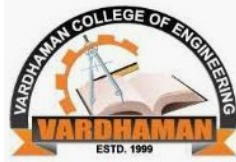

- It can be further expanded to provide more than one donation feature but also different options like live virtual interaction with needy.
- It can be further expanded to provide information regarding funds to everyone.
